

## 2015 Crop Year Fertilizer Sales Report

MINNESOTA DEPARTMENT OF AGRICULTURE

This report is summarizing the tonnage of fertilizer reported from licensed dealers as distributed OR sold in Minnesota<sup>1</sup>.

Each registrant under Minnesota statute section 18C.411 and each company licensed under Minnesota statute section 18C.415 must file an annual tonnage report for the previous year ending June 30 with the Minnesota Department of Agriculture (MDA). Forms provided by or approved by the MDA, stating the number of net tons of each brand or grade of fertilizer, soil amendment, or plant amendment distributed in Minnesota or the number of net tons and grade of each raw fertilizer material sold or distributed in Minnesota during the reporting period are used for reporting. (Minnesota Statute 18C.421)

Prior to using the information contained in this report, please note of the following:

- In this report, tonnages are reported as short tons with one ton equaling 2,000 pounds. When phosphate is reported, it is equivalent to P<sub>2</sub>O<sub>5</sub> and is used interchangeably throughout this report. When potash is reported, it is equivalent to K<sub>2</sub>O and is used interchangeably throughout this report.
- Fertilizer sold during a given year does not necessarily mean that the materials were “used” or land applied during that time period. On-farm storage has been increasing. This allows producers to purchase and store fertilizer products for future use when fertilizer products are readily available and/or at reasonable prices.
- Sales information may not accurately reflect fertilizer use in a specific county. The accuracy of the sales information is influenced by the location of the dealership and the location of the purchaser. If the farm is near a county boundary or straddles county lines, the seller may be reporting incorrect information. Some farming operations have fields scattered across multiple counties but the dealership may not know all the details necessary to accurately report on a county level. Example: In this report, Lincoln County reported annual sales of 18,462 tons of fertilizer sold and 236,800 acres of major crops

---

<sup>1</sup> Fertilizer can be reported as distributed or sold. Fertilizer sales does not equate to fertilizer applied. Fertilizer can be purchased one season and applied in another season. Fertilizer can be purchased in one county and applied in another county. Therefore it is not sold in that county, but distributed in that county.

In accordance with the Americans with Disabilities Act, this information is available in alternative forms of communication upon request by calling 651-201-6000. TTY users can call the Minnesota Relay Service at 711. The MDA is an equal opportunity employer and provider.

harvested in 2015 (corn, soybeans, wheat and alfalfa hay). Neighboring Pipestone County reported annual sales of 36,392 tons of fertilizer sold despite having less crop acres, 194,200 acres, of major crops. This large discrepancy is likely do to inaccurate sales recording.

- Clustering the sales data from neighboring counties removes the geographical biases. Regionally, this data becomes more accurate and the statewide sales data is considered very accurate.

Selected sale and distribution data and trends are graphed in the following charts.

Annual fertilizer sales by tonnage reported has increased over the past 25 years. From 1990 to 2000, annual fertilizer tonnage reported generally averaged 2.2 million tons. From 2000 to 2015, annual fertilizer tonnage reported increase to between 2.8 and 3.1 million tons.

Figure 1. Tons of fertilizer material reported sold from 1990 to 2015.

Fertilizer sales of actual nitrogen (units) has increased by approximately 25 percent from 1989 to 2015, Figure 2.

Figure 2. Actual nitrogen sold or in tons, from 1989 to 2015.

Fertilizer sales of actual nutrient (units) for P<sub>2</sub>O<sub>5</sub> has increased by approximately 25 percent from 1989 to 2015 while K<sub>2</sub>O sales has remained relatively stable though has shown grater annual variability.

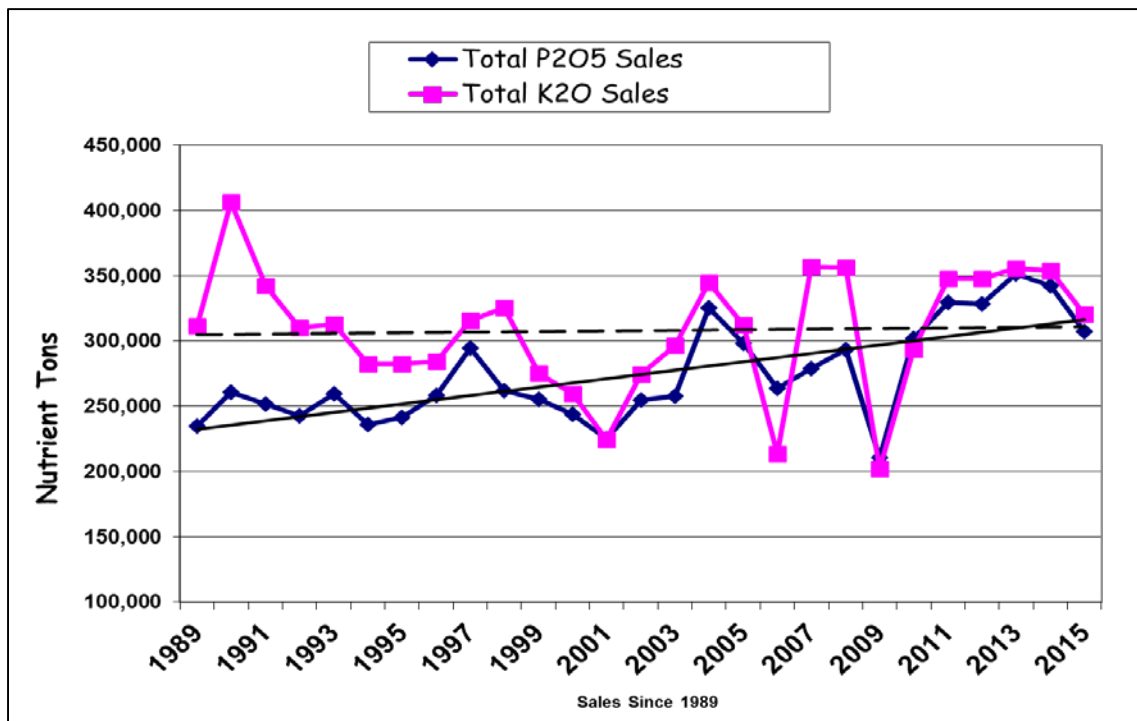

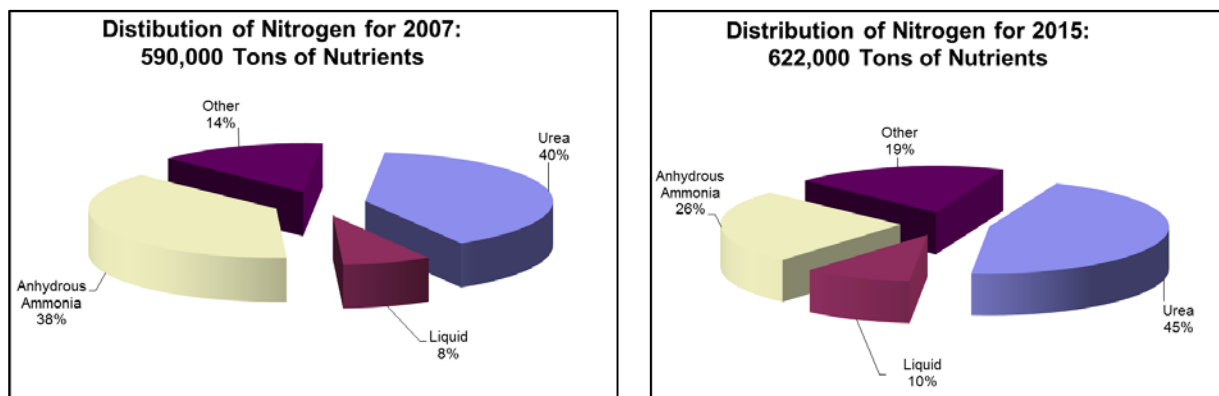

Figure 3. Actual P<sub>2</sub>O<sub>5</sub> and K<sub>2</sub>O reported sold in tons, as fertilizer from 1989 to 2015.

Anhydrous ammonia sales as a fertilizer source has been decreasing and other sources of nitrogen are increasing in sales from 2007 to 2015. Sales of nitrogen can vary from year to year as shown in Figure 2. Both 2007 and 2015 are near the long-term trend line and are used for comparison to exemplify how nitrogen fertilizer sources have changed from 2007 to 2015, Figure 4 and 5.

**Figures 4 and 5. Distribution of 2007 nitrogen sales compared to the distribution of 2015 nitrogen sales by actual nitrogen.**

There were no agricultural sales of ammonium nitrate reported for 2015. Sales of ammonium nitrate have been trending downwards since the late 1990's, Figure 6.

**Figure 6. Ammonium Nitrate sales expressed as total tons of product sold from 1993-2015 in Minnesota.**

Sales of fertilizer containing sulfur have increased from 1993 to 2015. Ammonium sulfate (21-0-0-24) sales have more than doubled since 2009. The sale of products of 12-40-0-10 and 13-33-0-15, private label brands, have also more than doubled since 2009. Meanwhile thiosulfate (12-0-0-26) and sulfur sources from potassium sulfate (0-0-50-17) and potassium manganese sulfate (0-0-22-21) have remained relatively stable. Elemental sulfur and fertilizers without N-P-K that contained sulfur were not included in the following figure. The MDA does not collect actual sulfur analysis of fertilizer products without N-P-K sources.

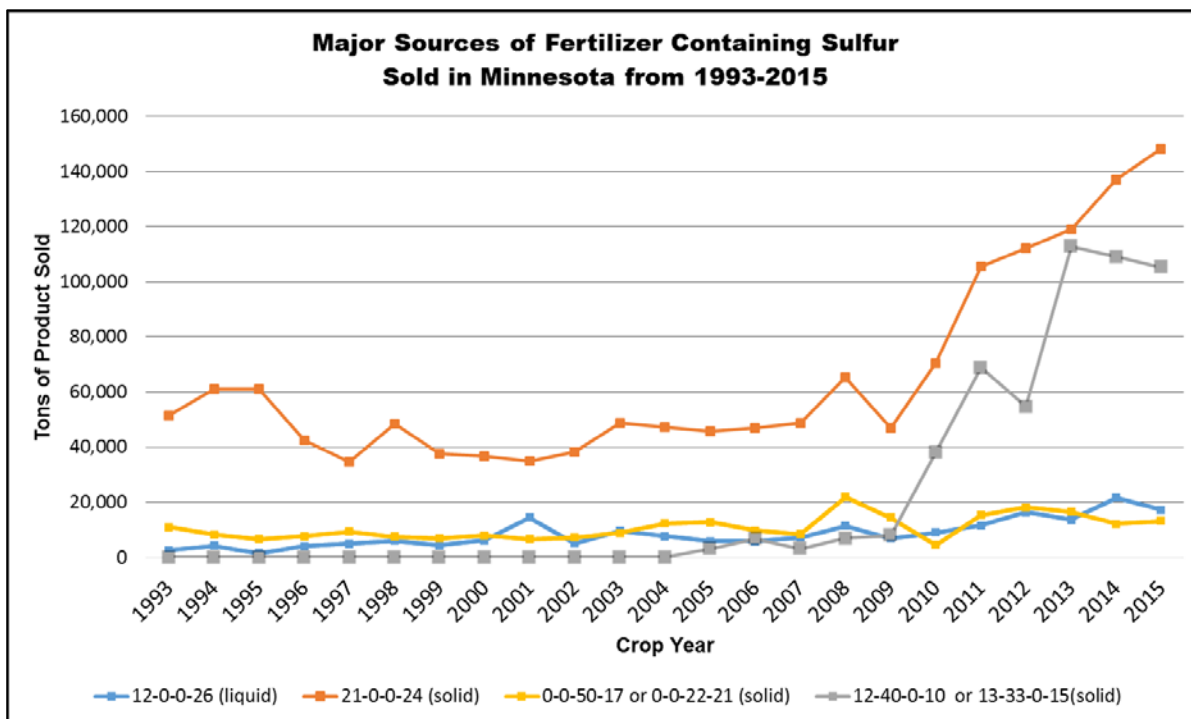

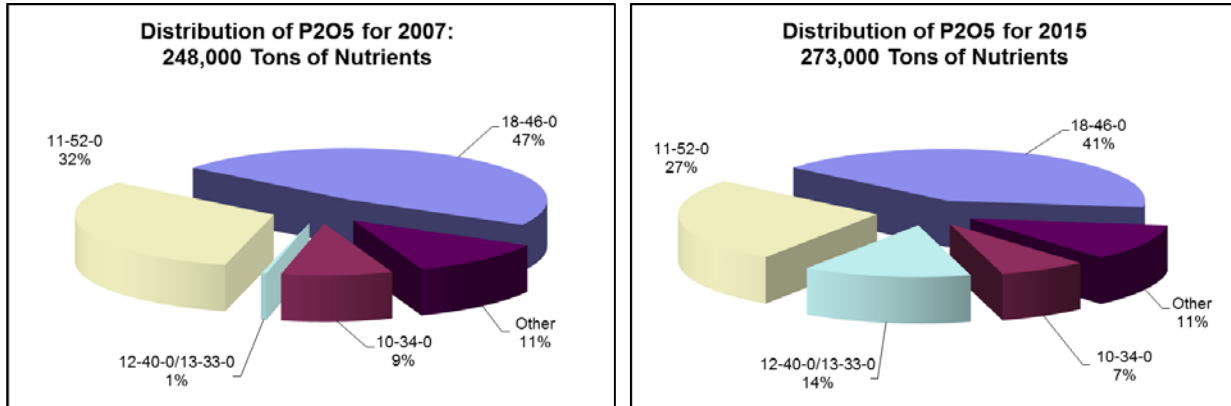

Figure 7. Major fertilizers containing sulfur expressed as total tons of product sold to farmers from 1993-2015 in Minnesota.

The fertilizer products of 12-40-0 and 13-33-0, sold as private label brands, have increased in use from 2007 to 2015. Both 2007 and 2015 year are near the long-term trend line for fertilizer sales as shown in Figure 1. Therefore, they are used for comparison to demonstrate how P2O5 fertilizer sources have changed from 2007 to 2015, Figure 8 and 9.

**Figures 8 and 9. Distribution of 2007 fertilizer product sales containing P2O5 compared to the distribution of 2015 product sales containing P2O5 by actual P2O5 nutrient.**
